## **EXPERIENCE** Najot ta'lim, July, 2024 – Present as **Support Teacher**

- Checking homework and tutoring students learning to program.

## **Digital Dev, Dec, 2022 – Present as *Full-stack Software Engineer***

- In the digital dev team, we implemented interex.uz and doshkazon.uz projects, and I did the frontend part of these projects.
- As for Interex.uz, this website automates the delivery of products throughout Uzbekistan, and customers are currently using this site. They say that this site makes work much easier, reduces labor and calculates benefits on time.
- Doshkazon.uz website is under construction, so I can't give any information about it.
- The frontend of both projects is implemented in React.js and the backend is implemented in Node.js Express.js.

## **Texnojoy, Dec, 2023 – Jan, 2024 as *Research Assistant intern***

- In this job, I acquired excellent skills in data collection and research on mobile apps and startups and delivered a comprehensive report enriched with in-depth screenshots. You can see my recommendation letter on my [LinkedIn](#) profile :)

## **Ace Edu Academy, Mar, 2023 – July, 2023 as *Mentor Frontend Engineer***

- I prepare students for frontend and teach them. I fully cover them in frontend HTML, CSS, SASS, Bootstrap and JavaScript and gave them basic knowledge of ReactJS.

## **TECHNOCORP, Aug 2022 – Dec, 2022 as *Full-stack Engineer Internship***

- I had a great experience working with the TECHNOCORP team and learned from 0 to raising a project. It gave me a great experience.

## **EDUCATION**

- TECHNOCORP in Tashkent, Oct, 2021 – Aug, 2022, Full Stack Software Engineer.

## **ACTIVITIES**

- Launched a tech-focused platform called [OMONTECH](#) and produced over 5 technology-related videos; shared content on Omontech and YouTube, attracting 100+ students and generating 2,000+ views.

## **PROJECTS**

1. **INTEREX.** We developed this website with Digitel Dev team, this website automates the delivery of products throughout Uzbekistan and all statistics this website only for this business owner. This website developed using React.js for frontend, Node.js and Express.js for backend.
2. **DIWASH.** Developed an informational website using Next.js and Tailwind CSS, which improved user engagement. ([Try it here](#))
3. **OMONTECH.** I developed this website using Next.js and Tailwind CSS for frontend, Node.js, Express.js and PostgreSQL for backend. In this website I publish my video courses such as HTML, CSS and SASS etc. ([Try it here](#))
